These forward-looking statements can be identified by terminology such as "will," "expects," "anticipates," "future," "intends," "plans," "believes," "estimates" and similar statements. Among other things, the business outlook and quotations from management in this announcement, as well as Vipshop's strategic and operational plans, contain forward-looking statements. Vipshop may also make written or oral forward-looking statements in its periodic reports to the U.S. Securities and Exchange Commission (the "SEC"), in its annual report to shareholders, in press releases and other written materials and in oral statements made by its officers, directors or employees to third parties. Statements that are not historical facts, including statements about Vipshop's beliefs and expectations, are forward-looking statements. Forward-looking statements involve inherent risks and uncertainties. A number of factors could cause actual results to differ materially from those contained in any forward-looking statement, including but not limited to the following: Vipshop's goals and strategies; Vipshop's future business development, results of operations and financial condition; the expected growth of the online discount retail market in China; Vipshop's ability to attract customers and brand partners and further enhance its brand recognition; Vipshop's expectations regarding demand for and market acceptance of flash sales products and services; competition in the discount retail industry; fluctuations in general economic and business conditions in China and assumptions underlying or related to any of the foregoing. ## Use of Non-GAAP Financial Measures

The unaudited condensed consolidated financial information is prepared in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”), except that the consolidated statement of shareholders’ equity, consolidated statements of cash flows, and the detailed notes required by Accounting Standards Codification 270 Interim Reporting (“ASC270”), have not been presented. Vipshop uses non-GAAP net income attributable to Vipshop’s shareholders, non-GAAP net income per diluted ADS, non-GAAP income from operations, non-GAAP net income margin, and non-GAAP operating income margin, free cash flow, each of which is a non-GAAP financial measure. Non-GAAP net income attributable to Vipshop’s shareholders is net income attributable to Vipshop’s shareholders excluding share-based compensation expenses, impairment loss of investments, and amortization of intangible assets resulting from a business acquisition and equity method investments. Non-GAAP net income per diluted ADS is non-GAAP net income divided by weighted average number of diluted ADS. Non-GAAP income from operations is income from operations excluding share-based compensation expenses and amortization of intangible assets resulting from a business acquisition. Non-GAAP operating income margin is non-GAAP income from operations as a percentage of total net revenue. Non-GAAP net income margin is non-GAAP net income as a percentage of total net revenue. Free cash flow is the operating cash flow adding back the impact from Internet financing activities and less capital expenditures, which include purchase of property and equipment, purchase and deposits of land use rights, and purchase of other assets. The Company believes that separate analysis and exclusion of the non-cash impact of share-based compensation, impairment loss of investments and amortization of intangible assets adds clarity to the constituent parts of its performance. The Company reviews these non-GAAP financial measures together with GAAP financial measures to obtain a better understanding of its operating performance. It uses these non-GAAP financial measures for planning, forecasting and measuring results against the forecast. The Company believes that non-GAAP financial measures are useful supplemental information for investors and analysts to assess its operating performance without the effect of non-cash share-based compensation expenses, impairment loss of investments, and amortization of intangible assets. Free cash flow enables the Company to assess liquidity and cash flow, taking into account the impact from Internet financing activities and the financial resources needed for the expansion of fulfillment infrastructure and technology platform. Share-based compensation expenses and amortization of intangible assets have been and will continue to be significant recurring expenses in its business. However, the use of non-GAAP financial measures has material limitations as an analytical tool. One of the limitations of using non-GAAP financial measures is that they do not include all items that impact the Company’s net income for the period. In addition, because non-GAAP financial measures are not measured in the same manner by all companies, they may not be comparable to other similar titled measures used by other companies. One of the key limitations of free cash flow is that it does not represent the residual cash flow available for discretionary expenditures. In light of the foregoing limitations, you should not consider non-GAAP financial measure in isolation from or as an alternative to the financial measure prepared in accordance with U.S. GAAP.

The presentation of these non-GAAP financial measures is not intended to be considered in isolation from, or as a substitute for, the financial information prepared and presented in accordance with U.S. GAAP. For more information on these non-GAAP financial measures, please see the table captioned “Vipshop Holdings Limited Reconciliations of GAAP and Non-GAAP Results” at the end of this release.
